## Summary

Passionate software developer specializing in the MERN stack, with hands-on experience in conceiving and developing impactful projects like ArtiCrafts. A dedicated learner, I thrive in dynamic IT environments, consistently mastering new languages and technologies. Eager to contribute my expertise and curiosity to drive innovative solutions and make a lasting impact.

---

## Experience

### Assistant System Engineer Trainee:

Tata Consultancy Services (TCS) • Gurugram, Haryana

**11/2022 - 09/2023**

Developed NodeJS project, integrated MongoDB & Express, created robust APIs for seamless functionality

---

## Projects

### [ArtiCrafts: Transforming visions into Reality :- My Startup Website:](#)

I spearheaded the conception and development of ArtiCrafts, a groundbreaking startup platform designed to empower local construction service providers and streamline homeowner's search for skilled professionals. Utilizing the MERN stack and elevating user interfaces with Tailwind CSS, the platform effortlessly connects homeowners with service providers like painters, electricians, and tilers.

ArtiCrafts's standout feature is its user-friendly search and listing functionality, facilitating homeowners in discovering and connecting with service providers based on specific categories. Service providers, in turn, enjoy heightened visibility within their specialties. Incorporating Amazon S3 for image storage enhances the platform, allowing service providers to showcase their work effectively, fostering a visually compelling and trustworthy environment. This project underscores my proficiency in full-stack development, emphasizing my commitment to crafting practical solutions that cater to the needs of both service providers and homeowners.

ArtiCrafts stands as a testament to my ability to not only transform ideas into functional solutions but also to address a real-world need within the community. This startup project not only showcases my technical prowess in full-stack development but also highlights my commitment to creating practical and impactful solutions that benefit both service providers and homeowners alike.

### INSTAMINI a MERN app:

"InstaMini" is a captivating MERN application that emulates a social media experience, encompassing user registration, image uploads, friend connections, and interactive features such as liking and commenting on posts. Seamlessly combining the power of MongoDB, Express, React, and Node.js, InstaMini offers a cohesive platform for users to share, connect, and engage, encapsulating the essence of modern social networking within its user-centric interface.

## Education

### Btech

Shadan college of engineering and technology • Hyderabad, Telangana

**Aug-2019 - Aug-2022**

Completed Graduation with 72% aggregate in computer science and Engineering.

### Diploma

Govt polytechnic kothagudem • kothagudem, Telangana

**July-2016 - May-2019**

Complete diploma with 90% in Mining Engineering

---

## Skills

- **Technologies** : React, NodeJS, Python, CPP, Express, Angular, Redux
- **Web Development** : HTML, CSS(Tailwind, Bootstrap), TypeScript and JavaScript
- **Database** : MongoDB
- **Others** : Data Structures and Algorithms, AWS S3
